

RG3 Rotary Level Indicator

Approved for explosive atmospheres:
ATEX zones 20 and 21 for dust

Application:

Designed to indicate the presence or absence of bulk materials such as grains, pellets, chemicals, wood chips, and other powders. It is ideal for hoppers and silos. The RG3 can be top and side mounted.

Method of operation:

The detection of material is achieved by a rotating paddle. If material impedes the rotation of the paddle, the motor topples on its axis and triggers an alarm

Features:

- An EASY TO INSTALL instrument that does not require any calibration, maintenance or specific tool for its installation.
- Thanks to the wide choice of paddles, all of which are interchangeable, it is ADAPTABLE to the different densities of the measured materials.
- Extremely VERSATILE, it can be installed on tanks, hoppers, on walls or roofs of silos, in a vertical, horizontal or oblique position.
- CUSTOMIZABLE with paddles, extensions, voltages, and different electrical connection options.
- Protection degree of enclosures for electrical equipment IP65.
- DURABLE and RELIABLE with aluminium casing, stainless steel shaft on ball bearings and electrical connection with tension clamp or screw terminals. Works with ambient temperatures from -20° to +70°C.
- Push-fit or screw terminal options.

Part Numbers:

RG3V56A-P	110/240 VAC Push-fit terminal block - Male thread 2 1/2" BSPP
RG3V4A-P	24 VDC Push-fit terminal block - Male thread 2 1/2" BSPP
RG3V56A-S	110/240 VAC Screw terminals - Male thread 2 1/2" BSPP
RG3V4A-S	24 VDC Screw terminals - Male thread 2 1/2" BSPP
